Online Shopping

Buyer Be Aware!!! Cyber criminals are constantly trying to obtain personal information online. Digital shopping is a treasure trove for information scamming. The following tips may help keep your computer and your money safe.

When using a computer, make sure the address of the site you're on either starts with **https:** or displays a padlock icon to the right of the address window, indicating a secure site. Never key in credit card information from an unsecured site.

Free Wi-Fi is great when you are out and about at your coffee shop or restaurant. However, limit your banking activity and credit card purchases. Free Wi-Fi allows the information you send or receive to be accessible to anyone.

Keep your computer and mobile devices up to date. Be especially proactive about updating anti-virus software and general operating systems.

Use a credit card. Using a credit card for online purchases will help prevent fraudulent activity from denting your checking account. Under Reg Z, any disputed credit card transaction must be resolved quickly. Be sure to check your purchase history regularly to detect and report any erroneous charges.

Bargains that are too good to be true. Many "trap" websites promote spectacular deals for the sole purpose of baiting excited or impulsive shoppers into giving up their private information and card details. If it looks too good to be true, it probably is.

As an added line of defense, Plattsburgh State Bank uses **Fraud-Watch® PLUS** to help protect our customers and their debit cards against fraud. Their "Fraud Prevention Services" team will contact you immediately if any purchases with your card seem suspicious.
